Q1. Which of these disorders is not a secondary cause of dyslipidemia?

- ☐ A. Asthma
- ☐ B. Hypothyroidism
- ☐ C. Type 2 diabetes
- ☐ D. Renal diseases

Q2. Not true about non-HDL cholesterol

- ☐ A. Better marker of atherogenicity compared to LDL cholesterol
- ☐ B. Cholesterol content of all atherogenic lipoproteins
- ☐ C. Can be evaluated only from fasting blood sample
- ☐ D. Reliable estimation of CV risk in hypertriglyceridemia

Q3. According to available data, 1 mmol/l increase in triglycerides increases CV risk in men by

- ☐ A. 5%
- ☐ B. 16%
- ☐ C. 32%
- ☐ D. 75%

Q4. Which of these is an indication for Lp(a) measurement?

- ☐ A. Accelerated CVD
- ☐ B. Premature CV disease
- ☐ C. Family history of premature CV diseases
- ☐ D. All of these

Q5. The recommended primary target for lipid-lowering therapies according to recent Lipid Association of India guidelines is

- ☐ A. LDL-cholesterol
- ☐ B. HDL-cholesterol
- ☐ C. LDL-cholesterol and non-HDL-cholesterol (cotarget)
- ☐ D. LDL-cholesterol and triglyceride (cotarget)

Q6. Heart failure with preserved ejection fraction (HFpEF) is diagnosed when EF is

- ☐ A. $\geq 35\%$
- ☐ B. $\geq 40\%$
- ☐ C. $\geq 45\%$
- ☐ D. $\geq 50\%$

Q7. Which of these beta-blockers has not shown potential to improve symptoms and reduce hospitalization and mortality rates in heart failure patients?

- ☐ A. Carvedilol
- ☐ B. Bisoprolol
- ☐ C. Metoprolol succinate
- ☐ D. Bucindolol

Q8. Overall most common type of cardiomyopathy

- ☐ A. Dilated cardiomyopathy
- ☐ B. Hypertrophic cardiomyopathy
- ☐ C. Arrhythmogenic right ventricular cardiomyopathy
- ☐ D. None of these

Q9. Which of these is a commonly known risk factor for venous thromboembolism?

- ☐ A. Prolonged immobilization
- ☐ B. Malignancy
- ☐ C. Previous VTE
- ☐ D. All of these

Q10. Modified Duke's criteria is for establishing diagnosis of

- ☐ A. Rheumatic fever
- ☐ B. Infective endocarditis
- ☐ C. Dilated cardiomyopathy
- ☐ D. Heart failure
