## **Diabetes** & its **COMPLICATIONS**

### CME OBJECTIVES

1. To update participants on conventional and emerging concepts related to natural history and pathophysiology and progression of diabetes
2. To update them on the current diagnostic and management approach for diabetes
3. To update them on potential complications, which may arise due to poorly-controlled diabetes.

## Diabetes & its COMPLICATIONS

### PROGRAM OVERVIEW

Diabetes has emerged as a major metabolic disease, posing enormous burden on not only the affected individuals but healthcare in general. A relentless rise has occurred in the prevalence of diabetes in last few years, particularly in developing countries, and this trend is likely to continue in the future. In this event, while new cases of diabetes across different age groups and subpopulations are being regularly added every year, in part affected by genetic and environmental risk-factors; it is often seen that suboptimal control of diabetes is also a major factor contributing to the growing burden of diabetes and its complications. Both morbidity and mortality rates related to diabetes therefore remain significantly high among the population.

This CME program is an attempt to update clinicians on the current and emerging concepts related to diabetes, its diagnosis and management, and potential complications so that clinicians are more confident when encountering patients with diabetes. The effort is targeted to improve patient outcomes through improved care supported by continuing knowledge.

**Dr. Brij Mohan Makkar**  
MD, FIAMS, FICP, FRCP(Glasg), FACP(USA),  
FACE(USA), FRSSDI  
Diabetologist & Obesity Specialist  
Course Director - Cleveland Clinic Advanced  
Certificate Course in Diabetes  
Diabetes & Obesity Centre, Paschim Vihar,  
New Delhi – India

#### Method of participation in the CME

- Enroll for the program by filling enrollment form
- You will receive the program module containing complete CME with post-test questions
- Study all parts of the educational activity
- Complete the questions and submit your answers
- A Medicine Update CME Certificate will be issued to participants upon completing the post-test with a score of 60% or better.
