

PROGRAM OVERVIEW

- Several ENT disorders are encountered around the world and are cause of considerable morbidity and mortality
- Many of these disorders may even require aggressive management
- It is imperative for otorhinolaryngologists to remain updated with the diagnostic and management approach of several of these disorders for improving patient outcome
- They also need to be abreast with advances in imaging and recent surgical approaches, such as robotic surgeries, which have been only recently introduced in ENT practice and are both less invasive and fraught with lesser complications compared to older conventional surgeries
- This Teaching the Teachers program is an attempt to address these issues and update the doctors on recent diagnostic and management approaches which have been introduced in ENT practice.

TOPICS INTENDED TO BE COVERED IN THE PROGRAM

- 1 Rhinosinusitis and its attendant complications, and its currently accepted management approach
- 2 Hearing loss in adults and children
- 3 Skull base tumors
 - Middle ear/lateral skull base tumors
 - Anterior skull base/sinonasal tumors
- 4 Current advancements in technology for different otolaryngologic disorders.
 - a) imaging b) diagnostic testing, c) surgical technology

Teaching the Teachers Program

ADVANCES IN OTORHINOLARYNGOLOGY

PROGRAM CURRICULUM

This program will be a scientific session in which Dr Anand K. Devaiah will interact with the participants of the program and provide a series of lectures on ENT topics mentioned below

- 1 Rhinosinusitis and its attendant complications, and its currently accepted management approach
- 2 Hearing loss in adults and children
- 3 Skull base tumors
 - Middle ear/lateral skull base tumors
 - Anterior skull base/sinonasal tumors
- 4 Current advancements in technology for different otolaryngologic disorders.
 - a) imaging b) diagnostic testing, c) surgical technology

Participants of the program will be conferred a certificate of participation. This Teaching the Teachers Program will be followed by an excellence program in which the participants of the Teaching the Teachers Program will train other doctors subsequently.

Participants of the Excellence Program will undergo a final evaluation and candidates who pass will receive an Excellence Certificate of Participation.
